

Experience the power of silver at the Thalen & Thalen exhibition *Brut!*. Father and son Thalen bring an exhibition to the Dutch Silvermuseum that stimulates the senses. It is silver to experience, what you want to taste, hear the sound and can keep looking at. Made from fine silver, the objects ask to be touched. Yet it takes a lot of hammer blows to make this relatively soft metal take the form of cutlery, plates, candlesticks or art objects. *Brut!* surprises and inspires the visitor with old, new and experimental work.

Brut!
