

Studio DIVA in Antwerp (B) is giving a masterclass embossing techniques wit Patrick Storme. Embossing is a technique used to shape precious metal and apply decoration. Rather than striking the metal with a hammer, the silversmith uses a punch to refine the form of the article and add subtle detail, ornamentation or figures. If you are a professional silver or goldsmith, jewellery designer or student with a good grounding, sign up for our masterclass by September 27th and draw inspiration from master silversmith Patrick Storme. The spoken language of the masterclass is Dutch.

Practical information

The masterclass will take place at Studio DIVA from 9:30 am till 4:30 pm; Saturday 31 October - Wednesday 4 November. The number of participants is limited to 6. Applying is possible until 28 September.

Cost of the workshop: € 550 (incl. lunch and entry to the museum; excl. VAT).

For all further enquiries please visit the [DIVA website](#) or email: tom.irijs@divaantwerp.be
